

# Tianjin First Cold Chain Equipment Trade Co.,Ltd

## Product Description

Industrial impact tunnel quick freezer, perfect freezing effect, suitable for various food; High efficiency, meets food standard. It's mostly used for flour food freezing, fruit and vegetable freezing, meat freezing, seafood freezing and prepared food freezing. In quick strip, cubic or grain food, such as shrimp meat, shrimp, sliced fish, meat dumpling, chicken. It saves energy and is convenient in cleaning and maintainance.

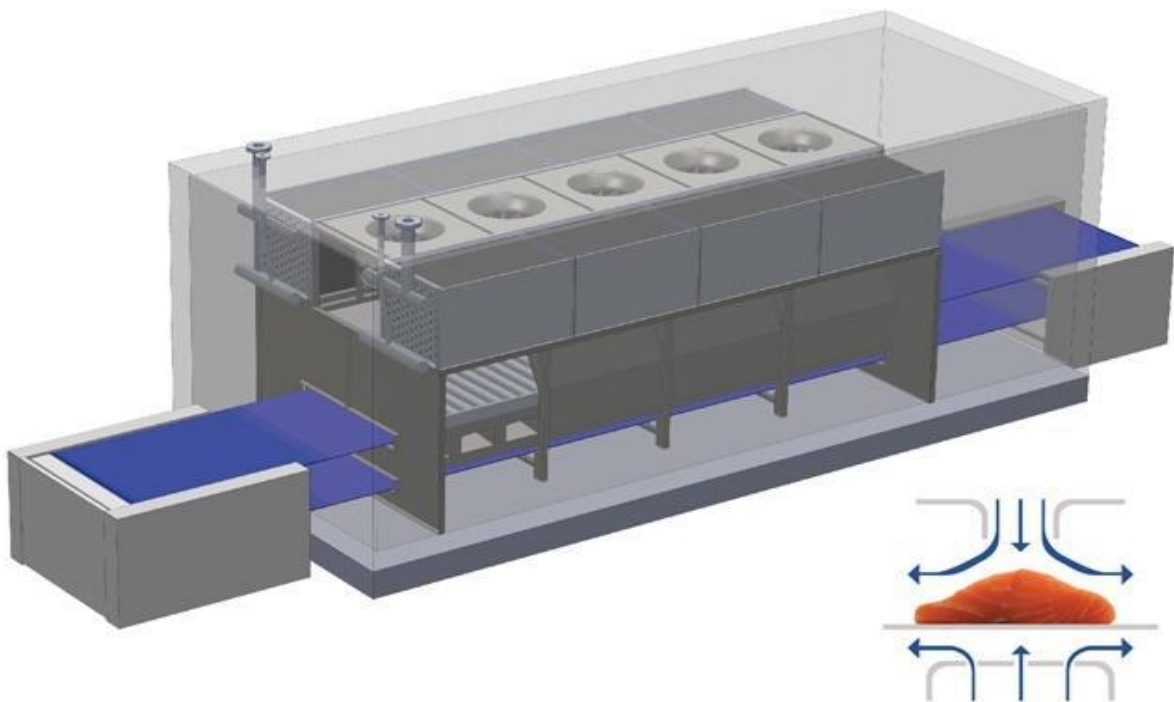

Impact belt individual quick freezer is a kind of high efficient continuous freezer, it is the new generation of product who has higher economic benefits and the food it frozen has the better quality and aesthetic appearance.

## Belt and Transmission System

- High strength stainless belt from Japan or Sweden
- Special technology to avoid the belt deflection and loose
- Smooth and neat in surface.
- Double reducers to guarantee the stable and reliable running.
- Applicable to IQF and BQF of different products.

## Electric Control System

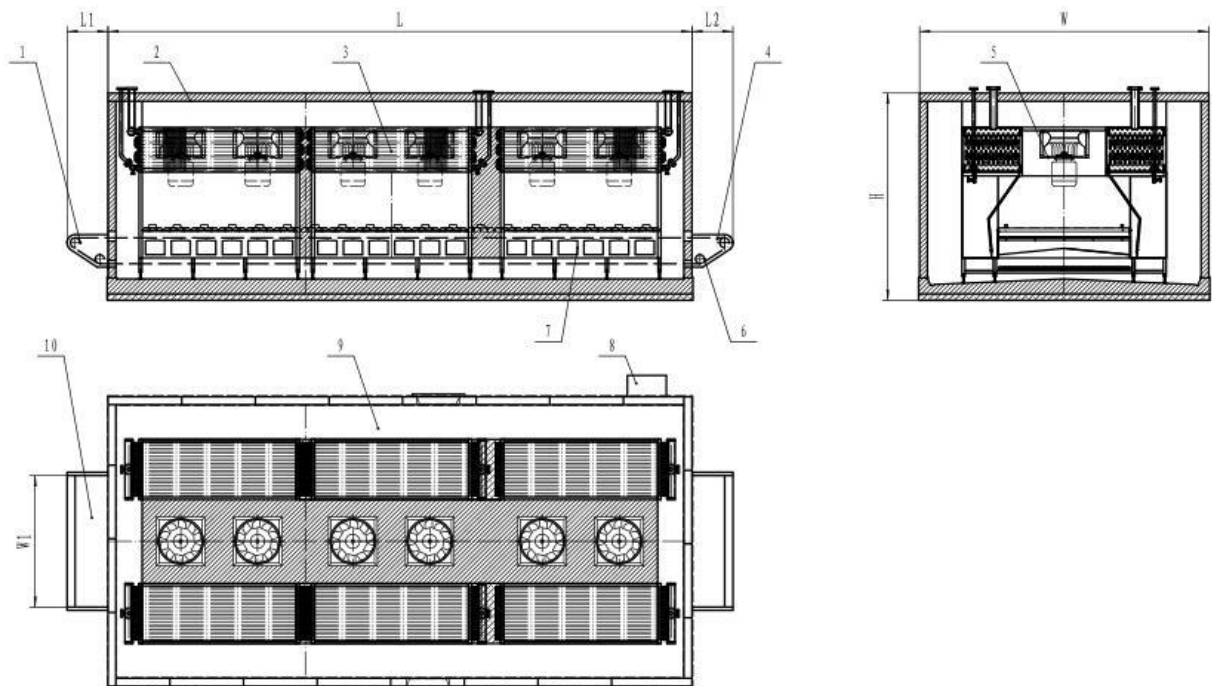

- Adopts the PLC(Programmable Logic Controller)control system of SIEMENS to ensure the stable running.
- The touch screen from EVIEW of KINCO to make control more convenient.
- Either overload or the cage fault detection can be accurately displayed on the screen, and accompanied by sound and light alarm.

# Tianjin First Cold Chain Equipment Trade Co.,Ltd

## Parameters

Output	500kg/h
Refrigeration capacity	174kw
Size	13*3.6*2.8m
Power	53kw
Evaporation Temp	-42°C
In feed Temp	+30°C
Out feed Temp	-18°C
Frozen Temp	-35°C
Defrosting method	Water
Coolant	R507 / R404
